DETAILED ACTION

1. The Amendment filed by Applicant on 05/09/05 has been entered.

Response to Amendment/Arguments

2. Applicant's amendment and arguments filed on 05/09/05 have been fully considered and they are found persuasive-in-part.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 15-16 remain rejected under 35 U.S.C. 102(a) as being anticipated by Mackenzie et al., U.S. Patent No. 6,103,658 (hereinafter "Mackenzie"). Mackenzie teaches the claimed invention. See Mackenzie, Claims Section. Thus Mackenzie anticipates claims 11-16.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. Claims 11-16 rejected under 35 U.S.C. 103(a) as being unpatentable over Klabunde, U.S. Patent No. 4,906,754 (hereinafter "Klabunde"). Klabunde teaches the preparation of ethylene/polar comonomers in presences of a nickel-catalyst. See Abstract; col. 1, lines 46-52. The difference between

Art Unit: 1713

Klabunde and the present invention is that the present invention teaches a saturated bridge and Klabunde teaches a $-C=C-$ bridge. The Examiner contends that to one of ordinary skill the bridges as used in the catalyst ligand structure are functionally equivalent. In addition to one of ordinary skill in the art, hydrogenation of the unsaturated bridge is obvious.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

9. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated

Art Unit: 1713

from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
